

## Animal Health Product Testing

Eurofins AvTech Laboratories applies the same scientific, quality, and compliance standards that it uses for human health projects to analytical support for the animal health industry. This means that all analyses performed by Eurofins AvTech on behalf of our animal health clients are fully GxP-compliant. In addition, we apply high throughput work processes to provide the shortest turnaround times possible, and our animal health personnel have access to the full range of instrumentation and expertise that is present in our human health support laboratories.

### General Capabilities

- Active Ingredient Testing of Medicated Premixes and Feeds
- Stability Storage & Stability Testing
- Pre-mixes, Feeds or Active Ingredients
- Regulatory Compliance Testing of Animal Feed Products
- Market Support for Animal Feed Products

### Special Expertise

- Feed Sample Grinding & Extraction
- Tissue Extraction
- Method Development & Validation
- Analysis of Drug Residue in Animal Tissues

### Equipment & Processes

- HPLC
- Microbiological Plate and Turbidity Assays
- UV Spectroscopy
- Access to LC-MS-MS, GC-MS, GC-FID, & Immunoassays
- High Throughput Work Processes

### Animal Health Methods

Amprolium	Lincomycin	Pyrantel Tartrate	Sulfamethazine
Carbadox	Monensin	Ractopamine	Tilmicosin
Chlortetracycline	Narasin	Salinomycin	Tylosin
Fenbendazole	Neomycin Nicarbazine	Semduramicin	Virginiamycin
Flavomycin	Oxytetracycline
